

▶ Fall In Love with Your Skin!!

Happy Holidays from RPSA!!

Holiday Glow or Winter Blah?!

Although it rarely dips below the fifties here, the coldest months we experience are on their way! Not only do we feel the chill in the air, but we start to feel the dryness in our skin! When we add moisture to the top of the skin we're only treating the problem superficially. A treatment that involves removing the dead skin cells allows the other products you use to penetrate more efficiently. A Micropeel or Microdermabrasion treatment will help you get your summer glow back AND make better use of your home care products!!

Dermaplaning– a solution for dead skin and hair!

Dermaplaning is a non-invasive form of manual exfoliation. A small surgical blade is used to remove the outer layers of dead skin and unwanted hair, leaving the skin smooth, supple and vibrant. There's absolutely no pain or downtime involved! Dermaplaning is the first step before applying lactic or glycolic acid peels. A true micropeel is the combination of manual and chemical exfoliation, giving you the best results possible! If you have normal to dry skin or scarring from past breakouts, you are an ideal candidate for dermaplaning. Schedule a complimentary skin analysis and I will explain dermaplaning and it's many benefits in more detail!

December 2009

Cooler days often mean drier skin and much needed hydration!

Buy \$200 worth of Kinerase Products and Receive a free K & Z Peel!!

Kinerase uses Kinetin and Zeatin, plant-based technologies that are scientifically proven to show improvement in the appearance of aging and sun-damaged skin. Kinetin is a powerful antioxidant that actually prevents plant leaves from drying out and withering. Zeatin is also an antioxidant that targets the more severe signs of aging such as wrinkles, hyperpigmentation, sun damage and blotchiness. Kinetin and Zeatin come together in Pro+Therapy, a line of Kinerase exclusive to Physicians! Some of our favorites from Kinerase...

Skin smoothing Cleanser-a gentle daily exfoliating facial cleanser containing Lactic acid and White Tea Extract. C8 Peptide Treatment- their newest product containing the most aggressive ingredients to combat facial wrinkles. Ultra Rich Eye Repair-a deeply hydrating cream containing Kinetin, Zeatin and Peptides. Advanced Repair Serum-a potent spot treatment excellent for lines around the mouth, containing peptides, plant extracts and Zeatin.

Don't forget to pickup your holiday Gift Certificates-in any denomination
